PORTFOLIO

sl3d.net

Photoreal imagery for products that are configured, not photographed.

01 Nubuiten — webshop stills & lifestyle scenes (2024)

Every product modelled to its real manufacturing dimensions, lit and framed like product photography.

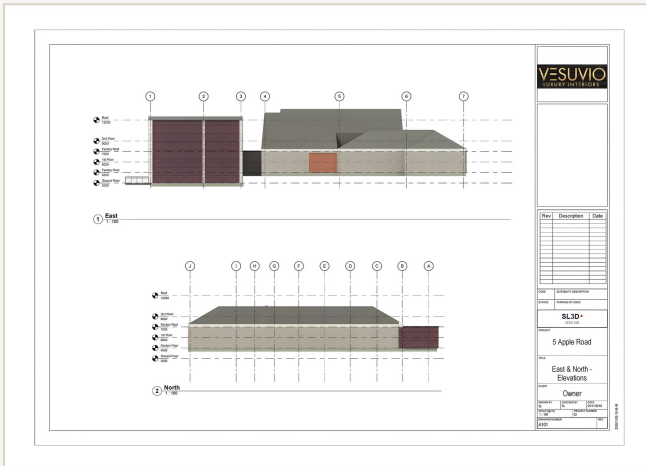

02 Outdoor Life Group — product & environment visualisation (2026, ongoing)

A reusable scene and material library keeps a multi-brand catalogue consistent and on brand.

One model, two deliverables: the drawing that builds it, the image that sells it.

5 Apple Road — architectural visualisation. The measured drawing set (plans, elevations, sections) and the photoreal street view are produced from the same geometry, so what is approved is exactly what is shown.

DRAWN

RENDERED

“Bringing new services to the company such as 2D and 3D CAD drawings and designs, which have improved communication and understanding of certain contracts tremendously.”

Employer's reference — Fixed Cost Property Maintenance (Pty) Ltd, Johannesburg

Understand → Model → Render → Deliver

01 Understand

Drawings, product data, mood references — starting from what the project actually needs to communicate.

02 Model

Accurate 3D geometry and CAD-clean technical drawings, built to real dimensions.

03 Render

Photorealistic stills, 360° panoramas and animation — materials and light treated like photography.

04 Deliver

Print- and web-ready files, revisions included, on the agreed date.

3D Rendering

Photorealistic renders and 360° panoramic views, across multiple modelling packages and render engines.

2D / 3D floor plans & technical drawings

Clear bird's-eye floor plans, elevations and drawing sets built to real dimensions.

Product animation

Turntables, assembly sequences and product reveals from the same accurate models as the stills.

Have a project that needs clarity? **Let's talk.**
